RESEARCH DEPARTMENT

Pesticide analyses were made on 63 TLA samples. More frequent incidence of DDT levels close to the German limit on finished products has been noted.

Several methods were tested for the purification of insect control proteins from Bacillus thuringiensis subspecies, which were then screened by electrophoresis and bioassays on Lasioderma serricorne.

In collaboration with a University 12-17 [illegible] alpha-amylase activity of the cigarette beetle was characterized [illegible] insecticidal proteins extracted from wheat and barley : a [illegible]ctive enzymes was obtained.

An improved calibration method for [illegible] yielded excellent agreement in a te[illegible] interlaboratory test will be condu[illegible] the method.

The source of a strange odor on "s[illegible] of the cards was suggested.

Rejection of a glue used for lami[illegible] after comparison with qualified m[illegible]

[illegible]ion
